BREDA DOORS. ALWAYS MORE BEAUTIFUL, ALWAYS SAFER

Breda is continuously looking for solutions to build its sectional doors **more beautiful, more resistant and safer**. From the Research & Development department comes the new lacquered **ULTRA Touch wood-like finish**, which is perfectly imitating the effect of natural wood and **more durable** over time.

Great news also in terms of **safety** with the new **hidden hinges** for built-in pedestrian doors. The hinges are recessed in the door panels and remain completely invisible. These hinges significantly **reduce the risk of injury** and also gain in aesthetics. For a perfect air circulation in the garage, Breda offers a **new lamelled aluminium ventilation grille** suitable for all VISA sections as well as for our folding doors.

ULTRA TOUCH

The new wood-like finish

The finishing that lasts
and reproduces
the beauty of wood

The new wood-like

Born from the work of our R & D interior department, Wood-like Ultra Touch is made by a special applied hot paint which totally fakes the natural wood: same porosity, same material aspect and same pleasant touch. The colours of the new lacquered Wood-like, available at the moment in the polished options Golden Oak and Walnut, are remarkable to the more experienced eye. But that is only one of the advantages, as the special composition of the new paint makes the finishing extremely resistant to the atmospheric agents, the usury or other aggressive media that can damage the appearance of any panel with film.

10 years warranty

An outstanding plus which makes Breda doors more beautiful over time. No doubt on that, as the company has decided to give it value by a 10 years extended warranty, effective on the whole range with finishing Wood-like Ultra Touch.

HIDDEN HINGES

For a still more beautiful and safer door

With the new recessed hinges,
your garage door
is as safe as never before

New recessed hinges

With the new hidden hinges, safety and appearance are at the top.

Indeed, Breda R & D interior department, always cutting edge in studying improving solutions for the efficiency and strength of the doors, has created a special containment system whereby the hinges pivots are wholly contained inside the panels.

Therefore no more elements at sight, but a perfectly homogeneous area, enriched by the thin profile of the pedestrian door which becomes a polished graphic element.

Safer door

And if the advantage is esthetically remarkable, safety is no less important. Indeed, the pivots are among the elements which the burglary attempts focus on: therefore the lack of these elements definitely decreases the forcing prospects.

VENTILATION GRILLES, discover Breda sectional doors new design

The large ventilation area of this new aluminium ventilation grille ensures maximum ventilation of your garage and grants perfect privacy as it is preventing from seeing through its openings.

Also perfect for folding doors, the new grille is compatible with all VISA sections as well as with all Breda glazed sections.

Absolutely simple and non-invasive in aesthetic is offered in the same colour of door coat.

In every Breda Showroom you feel like home

We periodically propose trainings to our Dealers and Installers with specialized courses in order to pass on all our knowledge and technological innovation that we continuously introduce in our products. Take the best decision: Always ask your Breda Dealer for your Residential garage door. He's the only expert able to understand your space needs and your taste.
