SPY motor

## BREDA NEWS

SAFETY AND AESTHETICS ABOUT PRODUCT DESIGN ALWAYS COME FIRST

Breda takes another important step forward for door safety and thanks to new devices coupled to SLB motors it grants the effectiveness of anti-burglary.

Combined with the new Breda pulling drive motor, the new Lock and Buzzer systems avoid any attempts of forcing and ensure the safety of houses and industries.

Great news also in design and functionality with the new Spy motors and their special sliding rack.

## The Evolution

The pulling drive motor evolves,  
so many interesting news add the suitable  
optional for the perfect home

Available

Four-channel transmitter 868 Mhz.  
Confirms signal reception by vibration.  
Cyclic repeat of the signal till the  
receiver confirms the reception.

## SLB pulling drive motor

Big news by Breda with the new SLB motors in the sectional door for both residential and industrial range. Three power variants: 600, 800, or 1100 Newton, essential design with Led light inserted in the SLB motor slide, and intelligent emotional accessories for doors with the new SLB pulling drive motors representing a real innovation: Lock and Buzzer devices grant the anti-burglary safety of the door, Pearl Vibe and Senso systems increase the functionality, the proximity sensor, the optical Laser and many other options to customize, as needed, each Breda door.

But even more: the new SLB pulling driving motor, as well as the door, is very easy and quick to install.

## SLB electronic control unit

The ease-of-use of Breda doors is granted also by individual logic of SLB motors.

The electronic control unit can be installed next to the door; an intelligent device that allows the complete control of the door movement thanks to the Open-Close-Stop and On-Off pushbuttons for the switching on of the courtesy light .

But even more: the refined design of the electronic control unit can be put in any environment, in perfect harmony with Breda doors.

LOCK the anti-burglary magnetic  
lock; it locks the door at any position  
with a power equal to 300 kg

The alarm detector BUZZER  
recognizes the burglary attempts  
and alerts by the acoustic signal

RELAIS adds 2 cleans contacts for the  
connection of eventual accessories like  
lamps both internal and external

SENSO the humidity sensor; the door  
opens just enough to allow a perfect  
air circulation and then closes again

MEMO extends the memory up to  
450 transmitters

PROXIMITY SENSOR is a radar which  
allows the automatic opening of the  
door if it detects movement (Internal use)

LASER is an optical aid to park a  
vehicle perfectly inside the garage

## SPY pulling drive motor

Breda sectional doors achieve the best in aesthetics and functionality with the new SPY motors. They move along a special sliding rack; a solution that makes smoother and more silent movements of Breda door.

Equipped with a power of 500, 650, or 800 Newton, the new SPY motors of Breda doors are characterized by consumption in stand-by, even lower than 0.5 W.

The separated control unit has a simple and elegant design. It also is easy to use and its programming is facilitated by the innovative Quick set-up.

## SOON direct drive motor

Breda sectional doors for industrial use have today the edge over thanks to the new SOON direct drive motor, installed on the springs assembly.

SOON is the ideal solution for those who need to perform many door openings in sequence.

It is powered by 24 volts direct current and equipped with electronic limit switch and special ramps of acceleration and deceleration that regulate the movement and limit, at most, the wear and tear.
